Nume epic: [Pantaru Andreea] Booking Application's Homepage

The Homepage of the "Booking Application" is the first page of the application.

Here, the user can:
register, login, read information about the application and the process of booking a room, contact the support team, search a hotel/room or property from Romania, see a selection of the hotels available for today, see the hotel of the day, suggest new improvements.

The Homepage has 3 main sections: header, body and footer.

The Homepage details and sections:

Header with the elements:
- Icon of the Booking Application and the name of the application

- "Welcome!" text

- "Currency exchange" link
- When user click on this link, gets redirected to a page for more information about the currency exchange applied in that day

- "Easy holiday plan wizard" link
- When a user clicks on this link, gets redirected to a page where can see some offers and tours for a full holiday.

- "Login" button
- when a user click on this button gets redirected to a login form where can enter the credentials for authentication

- "Register" button
- when a user click on this button gets redirected to registration form where can create an account
- the icon, links and buttons are aligned in the top of the header
- the buttons have a white font with a green background

- Background image with the text "Where will you travel today?"
- the image used as a background for the header is meant to be specific for holiday (sea/mountain photo), to have clarity, colors approved green/cream/blue.
- the text "Where will you travel today?" is located in the middle of the background image of the header, has a white font and a font size bigger than elements in the top of the header

When the user is logged in:
- the message from the header will be "Welcome, name of the user!"
- instead of buttons "Login" and "Register", the buttons "My account" and "Favorites" will be displayed
- A new icon will be displayed after login, the "Sign out" icon which disconnect the user from the account when clicked

Body with the elements**:**

- Search field with the "Where will you travel today?" placeholder and a search icon
- the "Search" icon should have the green color used for the header's buttons
- the placeholder has a gray font and disappears when the user types in the input
- when user types a valid location and press the "Search" icon, the user is redirected to another page and receive a list with hotels related with the added input

- Title "Undecided? Here is our selection for today!" that show a page section with the selection of hotels for the day
- In this section will be displayed maximum 5 pictures of 5 hotels randomly selected every day
- the picture selected will be the main picture of a hotel
- when hovering a image, the name of the hotel will be displayed on the bottom of the picture
- when a picture is clicked, the user will be redirected on the hotel page details

- Title "Hotel of the Day" that shows a single property chosen for today.
- In this page section, a hotel is selected for exposure, the daily selection is made randomly or a paid promotion is involved.
- the image displayed is the main photo of the hotel
- when the user hovers on the image, the name of the hotel is shown
- when the user clicks on the image , they get redirected to the hotel page details

- In the bottom of the body we have two texts with a correspondent button: "No account yet?" and the button "Register here" and " Have an account?" and the button "Login and start booking!"
- the buttons are aligned in the middle of the bottom of the body page
- the texts are arranged above the correspondent buttons
- the font of the buttons text is white with a green background.
- when the user hovers on the buttons they become highlighted
- when the user click on the buttons they get redirected on the Register page/ Login page

When user is logged in, instead of buttons "Register here" and "Login and start booking", two other sections are displayed: "Navigation History" and "Favorites":

- **"Navigation History" section**
  - the user can see the navigation history on the properties from this site
  - if history is empty, the text "Navigation history is empty…" will be displayed
  - if history has more than 4 elements, an arrow button will appear to allow the user to navigate through history
  - if history is not empty, a "Clear" button will be displayed
  - when "Clear" button is clicked the history will be deleted

- **The "Favorites" section**
  - if no item is added to favorite, under the "Favorites" section, the text "No favorites yet…"
  - if a hotel is added, the main image of the hotel will be displayed in this section

Footer with elements**:**

- background color used is #1E293B
- four sections named:"Terms and conditions", "Contact", "About us", "Suggestions"
  - the text color of the links is #60A5FA
  - when a user click on a link, gets redirected to the specific page
