Nume epic: [Pantaru Andreea] Booking Application's Register module

The Register module is a section of the Booking Application where the user can create an account for this site.

Here, the user has to complete a multiple fields form with personal data.

The form has two sections :

- Login Information
- Personal Information

The form starts with the title "Create a new account!" situated in the middle of the form footer.

Login Information elements**:**

- First Name text input field (with placeholder "Enter your First Name")

- Last Name text input field (with placeholder "Enter your Last Name")

- Email input field (with placeholder "Enter your email")

- Password input field (with placeholder "Enter your password")

- Confirm password input field (with placeholder "Confirm your password")

- Every field has a max 20 characters limit and a 3 characters limit

- To a better security and protection for users, the password field characters are hashed and displayed as dots

- The email field only accepts the email format (text@ gmail/yahoomail/outlook/text .com/.text)

- Password introduced in the "Password" field, needs to be exactly the same with the one introduced in the "Confirm password" field

- When hover on the fields from the Login information, the message displayed is: "Please fill out this field"

Personal Information elements:

- The title of this section is "*Personal Information (optional)"

- These fields are optional and not mandatory for creating an account

- First element is a dropdown with Country placeholder, that allows the user to select a country from a selection by clicking on the dropdown down arrow.

  ● Users can also type in the country and delete it by clicking on the "x" sign that appears in the field.

  ● If the value typed in is not a valid option, the message "No options" is displayed.

  ● Users can only select a single option.

- Second element in this section is a text field with the "City" placeholder

  ● The field accepts between 3 and 20 characters

- Address 1 and Address 2 elements are type text fields

- Gender dropdown element with 3 options revealed when the user clicks on the down arrow from the field.

  ● Users can also type in the country and delete it by clicking on the "x" sign that appears in the field.If the value typed in is not a valid option, the message "No options" is displayed.

  ● Users can only select a single option.

- Datepicker element with the "Date of birth" placeholder.

  ● It has the dd/mm/yyyy format with a calendar icon displayed.

  ● On the calendar are displayed buttons Clear and Today.

  ● Users can navigate through months, years and days and select the date.

  ● When typing it manually, the keyboard letters are enabled and only numbers are allowed.

  ● There is a limit age of 14 years old to create a new account

- Input text field with "Nationality" placeholder

    ● Here we have a 3-20 characters limit text.

- "Cancel" button element with a red background and white font text.

    ● By clicking this button, the user gets redirected to the Homepage and all data is deleted

- "Register" button element with a green background and white font text.

    ● By clicking this button, the user creates an account.

    ● When a user clicks the Register button without entering the mandatory data from the "Login Information" section, the warning message "Please fill out this field." will be displayed at the first field that isn't filled or doesn't respect the conditions.
